Protrans Mobile Apps Authentication Steps

Authentication of Protrans Enterprise is required to make mobile iOS apps work that are downloaded from this site as these apps are distributed via the Protrans Enterprise Account. This is a one-time process and it works for all future Protrans Enterprise apps as well.

Steps to Authenticate:

After Downloading the App, if you get the message "Untrusted Enterprise Developer" when opening the app, then:
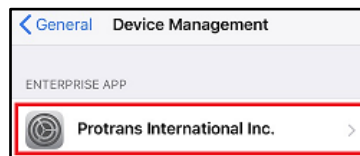

1. Open Settings

2. Click "General"

3. Go to "Device Management"

4. Select "Protrans International Inc"

5. Trust "Protrans International Inc."

With these simple steps, Protrans Enterprise Mobile Apps will be authenticated and these apps can be used.
